

Leaders in Safeguarding

For every business, the safety and well-being of their customers and employees is a top priority and the field of education is no different. So here at Green Corridor, we are delighted to announce that we have recently been awarded the prestigious 'Leaders in Safeguarding' quality mark, only the nineteenth organisation in the UK to receive this accolade.

This is in recognition of the high quality educational support and care we deliver to all our young learners, each of whom has a special educational need and learning difference.

We know from experience that provision of a safe and welcoming environment is the bedrock upon which vocational learning, personal growth and development is based. Feedback from carers, parents, learners and our Local Authority partners was also a critical element of the evidence base on which we were rigorously audited.

We remain absolutely committed to maintaining effective relationships with our safeguarding partners when it comes to the wellbeing of each and every learner in our care and will continue to place safeguarding at the very heart of everything we do.
