

Alfie's Story

Before Green Corridor, Alfie struggled in mainstream school. He had really low attendance which was less than 50%. Alfie had no future plans or aspirations, no support network including and didn't obtain an Educational Health Care Plan (EHCP). We took Alfie on as learner to complete a Level 1 Practical Horticulture Skills course with us in 2016. Since joining Green Corridor, Alfie has gained great confidence, has stronger social and communication skills and is able to deal with challenging experiences better. He has spent his time working and learning in our plots, he has represented Green Corridor at career fairs and has a strong group of friends. Alfie now has landed a job as a care worker at Voyage Care working with adults with learning difficulties.

“Green Corridor is a place where I have developed the most as a person, I am glad I have come here and have met the most amazing people.”
